---

## Work Experience

**Front end developer intern | Sushilaai web Solutions Dhule |**

**July 2024 – December 2024**

- **Assist with web interface development:** This includes creating and implementing user interfaces for web applications using HTML, CSS, and JavaScript.
- **Collaborate with designers and backend developers:** Working closely with other team members to ensure a cohesive and functional user experience.
- **Write clean, maintainable, and efficient code:** This involves following coding standards and best practices.
- **Participate in code reviews and provide feedback:** Contributing to the quality of the codebase and helping other developers improve their code.

## Project

- 1) **Cake website:** A cake website project using HTML, CSS, and JavaScript involves creating a web application for an online cake shop or bakery. It typically includes a homepage, product pages, a shopping cart, and potentially user registration/login and order placement functionality
  - 2) **Event management Website:** An event management system built with HTML, CSS, and JavaScript provides a digital platform for organizing, managing, and promoting events. This system can be a web application that allows users to view event details, register for events, and potentially manage their event information.
  - 3) **E-commerce Website :** An e-commerce website built with HTML, CSS, and JavaScript is a project focused on creating an online store where users can browse products, add items to a cart, and complete transactions. HTML provides the structural content, CSS handles the styling and presentation, and JavaScript enables interactive elements like product filtering, adding to cart, and checkout functionality.
- 

## Certificates

**Web development Certificate Of University Level | Certificate |** : Archive 1<sup>st</sup> Rank In that Computation

- **Full stack Web Development | Certificate |** : A Full Stack Web Development certificate demonstrates competency in both front-end and back-end web development, encompassing technologies like HTML, CSS, JavaScript, server-side scripting, and database management
